

## Quality and Environment ISO 9001-2015 ISO 14001-2015

Uden, 8 September 2020

The mission of RESER is to be(come) a TOTAL SUPPLIER for refurbishment, repair and support of all robots, pre-aligners, and robot controllers for all equipment that is used in semiconductor industry.

RESER is known as a company that delivers high quality products and provides outstanding customer support, both technical and sales. We never compromise on the quality of the products and services that we deliver and every support request is addressed immediately and in such way that our customer is satisfied with the provided solution.

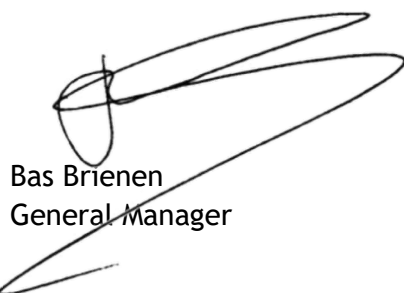

The Management of RESER has prepared a general company policy, dedicated to continuous improvement of the organisation. Focus areas are Quality, Health, Safety and Environmental care. We are looking to the best possible quality of work, protection of health of our employees, promoting wellness, preventing safety accidents and preventing and reducing our impact on environment. We respect and apply applicable laws, regulations and other requirements that are appropriate for us or our customers.

To make this visible for the outside we have implemented a management system complying with the ISO 9001 and ISO 14001 standards. This certification is provided and maintained by TÜV Nederland Certification Body through yearly periodic audits and a three yearly re-certification cycle.

The role of every employee (both own personnel and temporary workers) is to actively support the above policy and/or by working in accordance with the procedures laid down in the organisation manual. Input for improvements will originate from internal and external audits, workplace inspections, employees, and external parties.

This statement is public and is available for all employees and will be reviewed every three years.
