

Robot Development

Brooks Z-BOT

RESER has been working on various Brooks robot models for several years now.

As of today we now offer repair as well as an extensive refurbishment (OEM refurbishment) for the Brooks Z-BOT.

This refurbishment is beyond the industry standard.

Complete disassembly and rebuild of the robot. All the high wear items like bearings, timing belts and vacuum lines are preventively replaced. After the refurbishment, the vacuum circuit and repeatability of the robot are extensively tested.

You can expect the same quality standards that you have grown accustomed to from RESER. The Brooks Z-BOT robots are a great addition to the already comprehensive line of robots and robot related refurbishments RESER currently offers.

Interested in more information about this or any of our other products? Please contact your local sales representative or email us at sales@reser.nl
