## Briskheat Controller

### ASM A412 Briskheat Controller

#### Fixed Price Repair:

The ASM A412 briskheat controller repair includes the preventive replacement of capacitors, display and other components when needed.

All zones are checked and adjusted where needed.

After the repair the Briskheat Controllers are extensively tested and fully checked and approved by quality control engineers according to the high RESER standard.

Did you know RESER also offers the repair and refurbishment for several other ASM specific parts?

- Doorplates
- Elevator Gearboxes
- Motor Driver board
- A400 Robot boxes (Z2 axis)
- Mini Environment Blowers
- Bubbler Units
- TCU and TCF-flange heating units
