

Robot Development

Semitoool Raider

Recently, RESER has been working on the development of the refurbishment of the Semitoool Raider Robot.

As of today, we now offer the repair as well as a level 1 refurbishment for the Semitoool Raider Robot.

This level 1 refurbishment is done according to industry standard.

During the refurbishment we completely disassemble and rebuild the robot. Items like cabling and the slip ring are preventively replaced. After the refurbishment, the wafer handling and repeatability of the robot are extensively tested.

You can expect the same quality standards that you have grown accustomed to from RESER. The Semitoool Raider is a great addition to the already comprehensive line of robots and robot related refurbishments RESER currently offers.
