

Robot Development

Kawasaki Robots

RESER has been working on the development of the refurbishment of the Kawasaki Clean Robots used in the AMAT tools.

As of today, we now offer the Level 1 refurbishment (OEM refurbishment) for the Kawasaki NS410 and NS411 robots. Other models are available upon request.

After the refurbishment, the vacuum circuit, repeatability, and wafer handling of the robot are extensively tested.

You can expect the same quality standards that you have grown accustomed to from RESER. The Kawasaki robots are a great addition to the already comprehensive line of robots and robot related refurbishments RESER currently offers.
